### **Intermatic Fireman's switch 156T4042A**

Heater Delay Shut Off Switch for Intermatic Timers.

Must for pools on a timer with a heater.

Shuts off heater 15 to 20 minutes before time clock.

Fireman's switch kit for T100 series timer mechanisms.

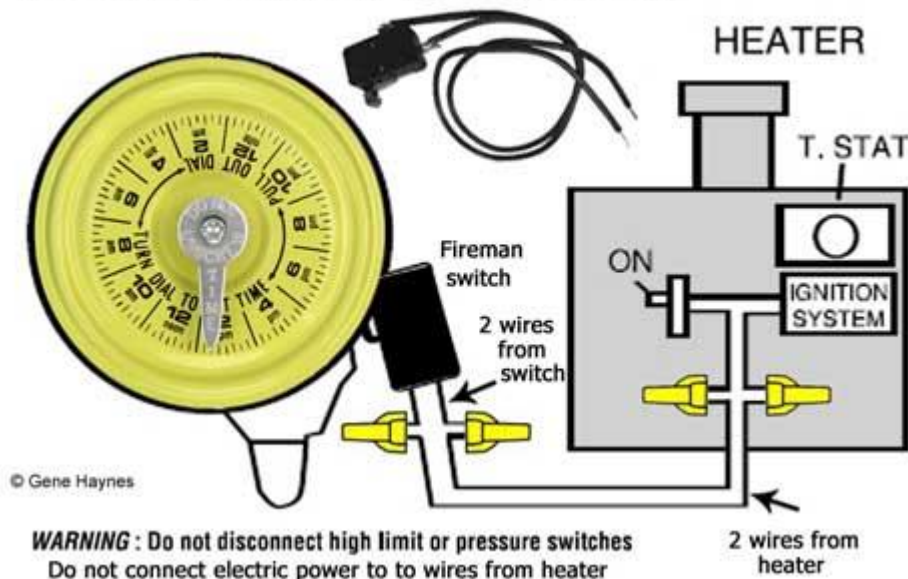

Screws into the timer mechanism.

Timer dial moves the microswitch lever that turns heater on-off.

Fireman's switch automatically shuts off heater 15-20 minutes before time clock trippers turn off pool pump.

## **Fireman switch installation**

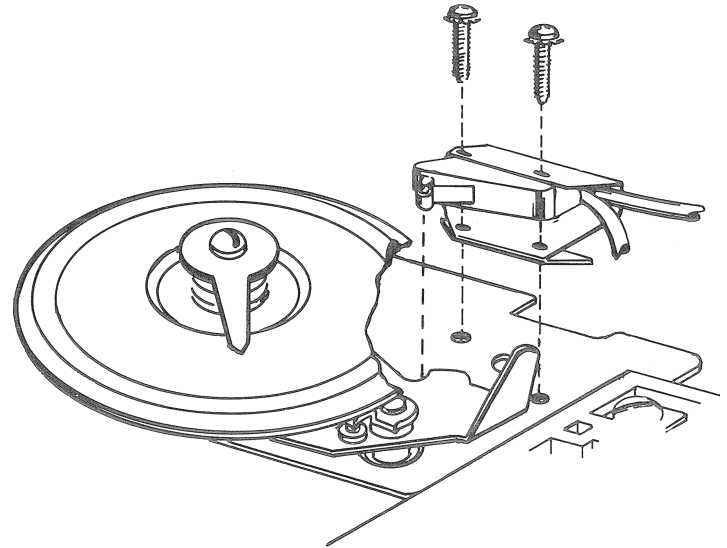

# **MODEL 156T4042A**

## **AUXILIARY SWITCH KIT**

**for INTERMATIC MODEL T100, T1000**  
**SERIES TIME SWITCHES**  
**Switch Rating: 10 AMP - 250 VOLT A.C. MAX.**

### **INSTALLATION INSTRUCTIONS:**

1. Fold insulator as shown.
2. Slide switch into folded insulator and insert screws as shown.
3. Place switch assembly over two mounting holes on plate, with slight downward pressure, thread self-tapping screws into plate.
4. Make sure switch assembly is firmly attached to switch plate. (Do not overtighten screws). Test for switch action.
