Safety precautions

- The connection and installation of electrical devices may only be carried out by a qualified electrician.
- Interventions in and changes to the device result in the voiding of the warranty claim.
- Observe your national regulations and the respective safety provisions.
- Fixed and flexible conductors of up to 10 mm² may be attached to the external terminal clips.
- Flexible cables with a cross-section $\leq 1 \text{ mm}^2$ should not be attached.

General information

- Deactivation commands take priority over activation commands.
- If the power supply is correct, the dots shown between the hours and minutes (HH:MM) are displayed permanently. The dots flash if the power supply is interrupted.
- If there is no power supply, the position indicator display goes out after 2 minutes.
- The whole display flashes the battery needs to be changed for up to 2 weeks to warn that.
