

The new degree of comfort.™

## Marathon® Heavy Duty non-metallic electric water heaters are designed for harsh environments and a warranty to back it up

### Non-metallic Tank Features

- Seamless, blow-molded, polybutene tank – impervious to rust and corrosion
- Multiple layers of filament wound fiberglass give the tank unmatched strength
- Polyurethane insulation helps reduce energy consumption
- Recessed drain valve is out of the way brooms and scrubbers
- High temperature polysulfone dip tube
- Tough molded polyethylene outer shell resists dents, scratches, and salt air

### Efficiency

- .91 - .92 EF
- Well insulated for reduced standby heat loss
- Pipe wrap energy saving kit included to achieve maximum energy savings

### Performance

- FHR: 87 - 101 gallons, based on gallon capacity
- Recovery rate: 17.3 gallons GPH at a 90 degree rise
- Thermostat delivers water temperature consistently at 170° F up to 175° F for high temperature applications

### Easy Installation & Service

- Marathon's lightweight tank is easier to maneuver and position. Bowl shaped tank bottom drains completely

### Plus...

- Titanium elements for superior corrosion resistance
- Full-flow, brass drain valve
- Temperature and pressure relief valve and factory installed vacuum relief valve
- Low Lead compliant
- Standard replacement parts

### Warranty

- 10-Year tank and 5-year parts limited warranty\*

\*See Residential Warranty Certificate for complete information

Units meet or exceed ANSI requirements and have been tested according to D.O.E. procedures. Units meet or exceed the energy efficiency requirements of NAECA, ASHRAE standard 90, ICC Code and all state energy efficiency performance criteria.

**Marathon Heavy Duty**  
85 and 105-Gallon Capacities  
240 Volt AC/Single Phase  
Electric

LEED Point = 1

Energy Factor and Average Annual Operating Costs based on 2013 D.O.E. (Department of Energy) test procedures. D.O.E. national average fuel rate electricity 12.00¢/kWh.  
 • Water heaters furnished with standard 240 volt AC, single phase non-simultaneous wiring, and 3800 watt upper and lower heating elements.  
 • For height to top of heat traps add 3-1/2" to the height to water connection.  
 • Maximum test pressure: 300 PSI; Maximum working pressure: 150 PSI
