\*Manual ON-OFF-AUTO switches for each circuit.

\*\*Various dials available from 6 to 60 minutes with minimum ON or OFF settings of 1/60th of the dial speed.

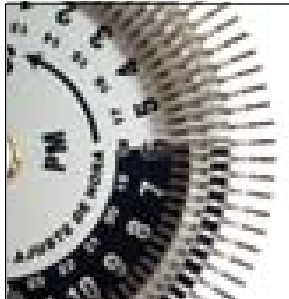

# TORK® ELECTROMECHANICAL CONTROLS FEATURES

## EASY TO SET DIAL ASSEMBLY

TORK'S 24 hour dial assembly allows the user to set the time switch more accurately, easily moving it by hand in small increments. Dial can provide up to 12 ON/OFFs per day with cyclers as short as 20 min. AM and PM settings are easy to see by the light and dark areas of the dial.

## CAPTIVE TABS - DUTY CYCLE DIAL

For applications requiring many ON/OFF cycles per day, captive tabs on this dial tilt in and out easily using fingertips!

## FIELD UPGRADEABLE ASTRONOMIC DIALS

All TORK 24 Hour Time Switches can be upgraded in the field to astronomic operation.

## SPRING WOUND RESERVE

During power outages, precision spring mechanism takes over instantly and automatically. Keeps time switch on time up to 16 hours on 24 hour models and up to 24 hours on 7 day models. No resetting is needed after resumption of power - and field installation is easy!

## ENCLOSED MOTOR

Enclosed time switch motor's gears are protected from dust and damage.

## REMOVEABLE DOORS

TORK Time Switches feature removeable doors to provide easy access for installation and wiring.
