## MIL72 24-Hour

The MIL72 Series 24-Hour timer modules are designed to be mounted inside a control panel and can accommodate surface/DIN Rail or flush/panel mounting. The time switches are light-duty commercial switches ideal for 24, 120, or 240 VAC single phase applications, such as lighting control, HVACR, pumps, motors, fan controls, access controls, OEM applications, agricultural facilities, and general purpose electrical circuits.
