

Heavy Duty
Wall Box Time Switch

HEAVY DUTY WALL BOX TIME SWITCH

The MARKTIME® 70 AB Series Wall Box Time Switch is a heavy duty 28 amp time switch available in either SPDT or DPST switch configuration. Specifically designed for handling exceptionally high current loads, the 70 AB Series fits into a standard NEMA double gang wall box and provides the highest amperage rating of any wall box time switch. Our customer service staff stands ready to work with you to meet any time control requirement.

APPLICATIONS

The MARKTIME® 70 AB Series Wall Box Time Switch is engineered specifically for demanding applications that require high amperage while remaining easy to install and operate. Typical applications include pool, spa, and sauna control in home and industry, track lighting, control of fluorescent and incandescent lighting, heating and heavy duty blower control, heavy industrial machinery, as well as other applications that require timed switching of high amperage loads.

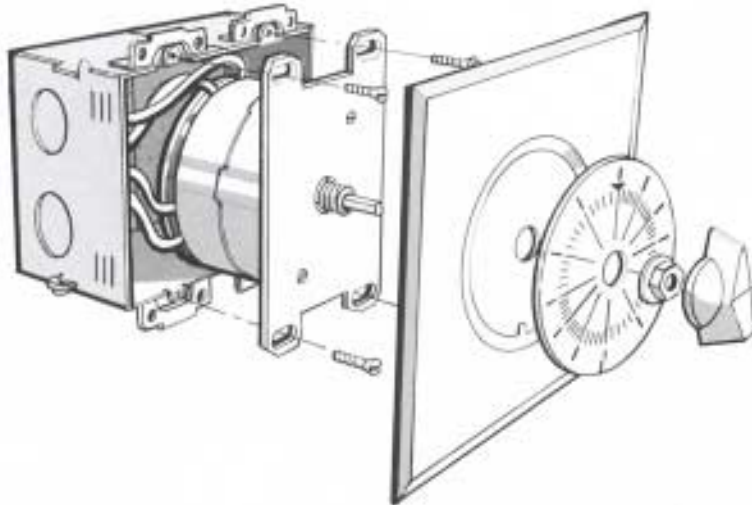

FEATURES

- Time ranges from 15 minutes to 12 hours all with + 10% accuracy based on maximum time
- Compact, easy to install dimensions that easily fit into standard enclosures
- Packaged complete with switch, dial, knob, insulator and installation instructions
- Two switching configurations SPDT and DPST
- UL listed and CSA certified
- Manufactured using the highest quality materials
- One year limited warranty

BENEFITS

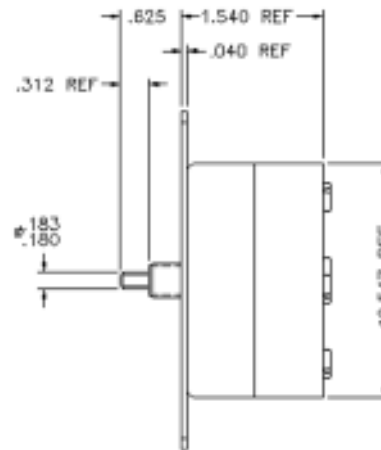

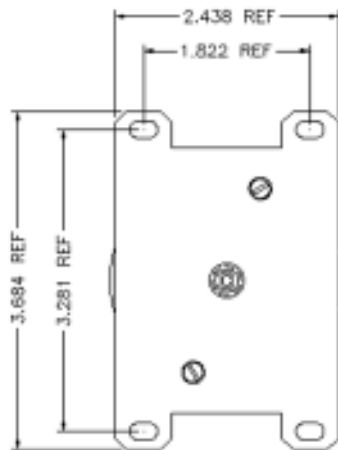

- Easy to use, with no special training required
- Reliable, proven design used on thousands of units
- The highest current ratings in a wall box configuration
- 70+ years of timer manufacturing experience

SPECIFICATIONS AND RATINGS

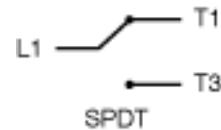

- For outside installation use NEMA type 3R enclosure (not supplied).
- 2 1/2" deep double gang box recommended. Box is not supplied with time switch.
- 4 wires (shown) for DPST time switch.
- 3 wires required for SPDT time switch.

RATINGS	
28 amp	120-240 VAC
1 hp	120-240 VAC
