

Possible manual for Powerfix timer

European 230volt probably uses clock hours 1 thru 24
Install 2 AAA batteries, or if timer does not have batteries, then
plug timer in for about 1 hour.

Set the time clock:

Enter clock setting mode
Press Mode button until 'clock setting' appears.
Day select with Day button
Hour select with Hour button
Minute select with Min button
Press PGM button To confirm current clock time
Press S/W button while in clock mode to toggle between Daylight savings time DST and sun icon
appears on display.

Program settings:

Press Mode button until 'program 1-20' displays, or press Prg button to enter programming.

Repeatedly press Prg button to cycle through programming.
Each program must have ON time, and then OFF time

Press Pgm button until display shows: Prg Set ON 1. This is program1 ON.
Day select with Day button
Hour select with Hour button
Minute select with Min button
Press PGM button To confirm program1 ON

Press Pgm button until display shows: Prg Set OFF 1. This is program1 OFF.
Day select with Day button
Hour select with Hour button
Minute select with Min button
Press PGM button To confirm program1 OFF

Press Pgm button until display shows: Prg Set ON 2. This is program2 ON.
Day select with Day button
Hour select with Hour button
Minute select with Min button
Press PGM button To confirm program2 ON

Repeat steps for up to 20 programs.

Exit programming mode, press Mode button until 'clock' shows.
Timer is ready for operation.
