

## Stanley Timer MAX 31206

24Hour indoor digital timer

- 1) Plug timer into 120Volt wall outlet for 1 hour to charge battery. Unplug timer to program. After timer is programmed, plug lamp into the TimerMax. Turn lamp ON. Plug timer into outlet.
- 2) Set current time by holding Time button down as you press Hour and Minute buttons until the current time displays.
- 3) Set the ON time: Hold down the On button as you press the Hour and Min buttons until the display reads the time you want timer to turn ON.
- 4) Set OFF time: Hold down the Off button as you press the Hour and Min buttons until the display reads the time you want timer to turn OFF.
- 5) If timer does not operate, check outlet with circuit analyzer. Make sure breaker is not tripped. Make sure light bulb is good. Try timer on different outlet. Plug different lamp into timer.
