

Unconditional Energy Savings

T1975EHD delivers superior energy savings for every environment!

Built to Last

From a Texas oil field on a scorching summer day to a poultry fogger in the heartland of America, the rugged Intermatic T1975EHD Mechanical Time Switch keeps your equipment running efficiently.

- *Heavy-duty metal dial withstands punishing environmental conditions*
- *Full 480V encapsulated motor protects gears from debris*
- *Easy-to-set trippers and skipper wheel provide fast and accurate setting*
- *Up to 96 operations every 24 hours, with minimum ON/OFF timer intervals of 15 minutes*

For Smaller Applications

Use the 120 VAC T1905HD mechanical time switch. The no nonsense T1905HD features a heavy-duty metal dial designed to withstand the most punishing environmental conditions. A new full 120V encapsulated motor protects the gears from debris. Easy-to-set trippers conveniently slide in and out for fast and accurate setting.
