Product Description

Amazon.com Product Description

Designed for use with lighting, fans, and security applications, the Woods 13568 Indoor Three-Outlet Wireless Remote Converter Kit features a wireless transmitter that makes it easy to control a range of devices--both indoors and out--with a simple click of a button. It comes with one controller, three receivers, and a battery.

Operate up to three different home appliances using one remote control.

Operate Three Different Appliances with One Remote Control

Great for the mobility impaired, and anyone who just wants a one-touch, convenient way to turn on and off appliances, the Woods 13568 Remote Converter Kit includes a wireless transmitter for fast, easy control of different appliances, lighting fixtures, and more. With this handy kit, you can operate up to three different home appliances from across the room--or across the house--using one remote control.

Wireless Signal Extends up to 40 Feet

The signal from the remote control travels through walls and other obstacles and extends up to 40 feet, making it a snap to control appliances in different areas of your home with a single click.

This system includes three separate receivers for the wireless operation of three different appliances at once. Use in one room or multiple locations to control holiday decorations, ceiling fans, porch or garage lights, indoor lamps, and more.

Fast, Tool-Free Setup

Designed to be user friendly, the 13568 sets up easily without tools and guides you through the installation process. When first plugged in, the red ON light blinks, which means that you can program the unit just by pressing the ON button. If you remove the unit and move it to a new location, simply repeat this easy procedure.

About Woods

In December 2007, Coleman Cable completed the acquisition of Woods Industries. Coleman Cable and Woods combine to continue as a leader in product innovation, packaging design, and merchandising for a wide variety of electrical corded products, bulk electrical and electronic wire, surge protectors, garden lighting, timers, and other accessory items for the consumer. Now the family of prominent brands includes American Contractor, Yellow Jacket, RoadPower, Moonrays, and SmartStrip, to name just a few.

For more than 75 years, Woods has been a leading developer of electrical products for consumers and professional contractors. Woods has an extensive record as an innovator in product development, packaging and retail displays, collaborating with customers to deliver quality products.

What's in the Box

Controller and three receivers.

The logo for Woods Industries, featuring three vertical bars of increasing height to the left of the word "Woods" in a bold, sans-serif font.
