

Thank you for purchasing our Woods Model TIM1000 – Indoor Mechanical Timer.

Before using your timer, please read the following instructions carefully.

**FEATURES:**

- 2 ON/Off settings per day
- 30 minute interval settings
- Safety – setting pins can only be released if center button is depressed
- Standard 2-prong outlet
- Manual override switch – allows you to turn lights ON at any time

To set the timer:

1. Set current time by adjusting timer dial so correct time is lined up with the arrow (under letter T).
2. Depress center button to release pins.
3. For “ON” time, insert gray pin into desired “ON” position. For “OFF” time, insert white pin into desired “OFF” position. Repeat with second set of pins if desired.
4. Ensure manual override switch is in the “AUTO” (Clock Icon) position. (see Fig.1)

Note: You may override operation of the timer by rotating the manual override switch located on top of the timer, to the “ON” (I icon) position. (see Fig.1)  
The timer will remain in the ON position until switched back to AUTO position, at which time your program will resume.

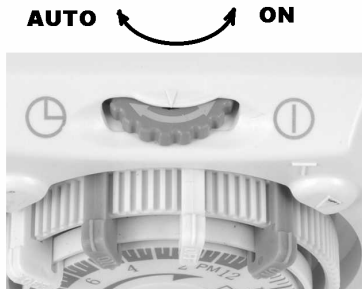

Fig.1

**WARNING:**

For indoor use only.  
Do not exceed the maximum ratings of the timer.

**SPECIFICATIONS:**

125V AC/60Hz  
15A/1875W Resistive  
8A/1000W Tungsten  
1/2HP

Note: Resistive is the rating for appliances.  
Tungsten rating relates to the total wattage of light bulbs used.
