Product Description

From the Manufacturer

Timers are handy to have around the home - save money by only running lights and appliances when needed - just set the timer to turn the appliance 'on and off' on the best schedule for your household. Kids and teens can forget to turn off lights - setting a light on a timer eliminates that problem. And setting a entry lamp on a timer gives your home a lived-in look when you aren't home and a "welcome home" light when you return after dark. Use with dehumidifiers, air purifiers, aquarium lights, white noise machines and so much more. Convenient 2-pack . 48 separate settings are available each day and the cycle repeats every 24 hours. NEVER-LOSE pins mean the pins can't fall out and become lost. Two conductor prongs. Ratings: 1125V,10A, 1250W Tungsten - 25V, 15A, 1875W Resistive - TV-4, 1/3HP
