Product Description

The Woods 59711 15-Minute Spring Wound Timer is a in-wall timer has a simple dial mechanism, simply set the dial to the number of minutes you want the fan to run. Never worry that you left the bathroom exhaust fan on all day again. Timer will run up to 15 minutes and turn the fan off, helping to keep moisture levels down in the bathroom. Also ideal for lights, bathroom heat lamps and whole house fans. Installation is easy - just install in place of existing wall switch (standard toggle or decorator wall plate). The timer is compatible with compact fluorescent bulbs.
